Please enjoy looking through my portfolio. I have carefully selected a variety of images to demonstrate different subjects, lighting conditions and subjects as well as some more experimental pieces I have created.

All the post production has been completed by myself.

If you wish to see any more examples of my work, please feel free to visit either one of my freelance photography websites:

[ipovphotographer](#) for my personal, charity and client work and [Constellation Weddings](#) for all wedding photography.

febreze

These are two experimental pieces playing with gender within product photography

Although not my  
photography, this was edited  
fully by myself for a brief in  
University
